

Fast Forward Study Plan Improvements

We are excited to announce a new version of the Study Plan in Fast Forward.

The new version, which launched yesterday, provides a more personalized study plan for each student, as well as some improvements to the teacher review page. Learners should see no difference in how the page looks, but the assigned lessons may have changed slightly to better match their scores on the pretest.

✓ Completed
by Student

■ Passed
on Test

■ Assigned
by Test

■ Assigned
by Teacher

Numbers and Operations

✓ [Assign](#) [1.1 Use Signed Numbers](#)

✓ [Assign](#) [1.2 Learn Basic Properties and Operations](#)

Linear Expressions

[Remove](#) [2.1 Picture and Write Basic Expressions](#)

[Assign](#) [2.2 Evaluate a Simple Expression](#)

[Assign](#) [2.3 Simplify and Write Expressions](#)

However, as teachers, you will see improvements making it easier to track your students' progress through the courses. The lessons assigned by the pretest will not change color for the teacher, so you can always look back and see what the original study plan told the learner they needed to work on and what they "tested out of" in the pretest. In addition, the checkmarks on the left now show you exactly what lessons the learner has completed. At a glance, you should now be able to tell the difference between what the student passed on the test and what they have actually completed in the course.

But wait...there's more!

Are your students still struggling with the extended response questions on the GED[®] Reasoning through Language Arts test? There are two additional printable practice opportunities in Fast Forward's Teacher Toolkit. The Language Arts section of the Teacher Toolkit also contains both an educator's scoring tool and a student self-assessment tool to help you and your students evaluate their writing.

That's the latest for now. For future updates, click Latest News in the left sidebar of the Teacher Toolkit page!
